**DO NOT MUTILATE THIS BOOK.**

Please do not cut illustrations from this book to enclose with orders, as it is entirely unnecessary.

If you will give us the name of the article, quantity, size and price wanted we can correctly fill your order.

Please, therefore, DO NOT MUTILATE YOUR CATALOGUE by sending us illustrations.

Address all letters and money orders and drafts payable to ARCHIAS’ SEED STORE CORPORATION 106-108 East Main St. Sedalia, Mo.
Our Prediction.

"If a man preach a better sermon, write a better book, or make a better mousetrap than his neighbor, though he build his home in the woods, the world will make a beaten path to his door."

This is equally true of the seed industry. When we began business over a quarter century ago we were under the impression that there would always be a demand for the BEST. Our prophecy was the correct one.

The demand for "Archias' Sure Seeds" has steadily increased all these years until now our plant is one of the largest in the country and will have to be expanded still farther to take care of our increasing trade.

Why this enormous business? There are three reasons, i. e.: superior goods, full weight and square dealing. Why waste your money with inferior seeds of unknown quality and work overtime trying to perfect them? Buy Archias' "Sure" Seeds and Supplies that the trade mark is a household word, and let the other fellow worry.

Give the prices in this catalogue a chance to testify that we do share with our customers the benefits of experience, quality and low cost. Kindly look our catalogue over carefully for what you are in need of and send us your orders. If our prices are not right, or if there is anything not satisfactory, write us, be friendly, and we will do our utmost to please you.

Every order, no matter how small, is given our personal attention.

Our catalogues are free. Tell your neighbors about the Archias' Plan, and have them send for our catalogue; thus you do a two-fold favor, which we assure you is appreciated, as many hundreds of new customers are added each year by the recommendations of our old friends.

Heartily wishing one and all a Happy and Prosperous New Year, we remain, Most sincerely yours,

L. H. ARCHIAS, President.
L. A. KIPPING, Vice President.
L. ARCHIAS, Secretary.

Archias’ Selected Tomato Seed.

ARCHIAS’ TOMATO SEEDS ARE THE VERY BEST GROWN.

Culture—The best crops are grown in warm, light soil. For extra early fruit the seed should be sown in a hotbed or in boxes about the first week in March. Sow seed in rows four inches apart and cover one-half inch deep. When all danger of frost is past set out in the open and water until the plants are established. For later use the seed may be sown out of doors.

Archias' Mammoth Tree Tomato.

GREATEST WONDER OF THE AGE.

Thousands of our friends have planted Archias' Mammoth Tree Tomato for over fifteen years, and it is more popular today than any other variety, especially to the family gardener.

Fruit is of mammoth size, flesh very thick, excellent flavor, ripens well up to the stem; color dark red, tough skin. Pears well throughout entire summer, holding its large size during severe drought, while other varieties are dried up. It continues to bear its fruit with the greatest vigor until killed by the frost. Shape round and smooth. The yield of this Tomato is simply enormous. One bushel having been picked off the same plant in one picking. Well cultivated plants have attained the height of 10 feet, and 9 feet across. This should not be classed with other so-called tree tomatoes of some houses, as it is the only genuine Tomato of the kind now in existence. Price: 10c per pkt.; 3 pkts. 25c; 4 oz.; 40c; 1 lb., $1.25; 1 lb., $1.50, by mail, postpaid.

OUT YIELDS ALL OTHERS. OUT SELLS ALL OTHERS! DELICIOUS FLAVOR! SOLID MEAT!

We have hundreds of letters that space will not admit, praising this wonderful Tomato.

ARCHIAS' TOMATO SEED
Are the Very Best Grown

Crimson Cushion or Beefsteak.
This valuable new Tomato was introduced by Peter Henderson. It is of remarkable size, frequently weighing a pound or more. Color, brightest crimson scarlet; very solid, with few seeds, and ripens evenly to the stem. Very productive and early, considering its size. Pkt., 10c; 1/4 lb., 35c; 2 oz., 65c; 1 lb., $1.00; 1 lb., $3.75.

Livingston's Perfection—Large, early blood-red, smooth, flesh thick, excellent for canning. Oz., 20c; 1/4 lb., 50c; 1 lb., $1.50.

Preserving Tomatoes.

Yellow Pear (See illustration on the left.)—Similar to the Plum, but the fruits have a slim neck or distinct pear shape. Pkt., 10c; oz., 30c; 1/4 lb., 83c.

Red Cherry—Small fruits; used for pickles. Pkt., 5c; oz., 25c.

Red Plum—Bright red, round; used for pickles. Pkt., 5c; oz., 25c.

Peach—Fruits one and a half inches in diameter. The skin is covered with a slight bloom or pubescence, as in a peach, and of beautiful coloring. Each Red or Yellow Peach, pkt., 10c; oz., 30c; one pkt. each for 15c.

Strawberry or Husk Tomato—Plants of low-spreading growth and immensely productive. The small yellow fruits are each enclosed in a husk. Of very sweet flavor, highly esteemed for preserving or making pies. They are also excellent to eat raw as fruit. Pkt., 10c; oz., 30c.
Tree and Hedge Seeds.

It is said that in twenty-five years our forests will be virtually, if not fully, exterminated for commercial uses. America is on the eve of a forest famine. This is inevitable. Hence forestry or tree growing for profit must and will become an industry in this country, the same as wheat and alfalfa. The end is near, and soon 100,000,000 people in a timberless land will be appealing to 40,000 empty, idle mills for 50,000,000,000 feet of lumber annually.

General Rule—Plant tree seeds in early spring in drills about two feet apart; cover % inch or more in depth, according to size of seed; keep them from drying out.

One pound lots and less include postage. Larger lots at buyer’s expense.

Prices subject to change.

Osage Orange—A native from Texas, but has been generally introduced over the country from its extensive employment as a hedge plant. The best way to prepare the seed for planting is to soak in a running creek until it commences sprouting, then plant like any other seed. Another way to sprout it is by putting it in a vessel and covering it daily with warm water, until the sprouts come up. We prefer the first mentioned. Proper time to sow is in April or May.
Pkt., 5c; oz., 10c; lb., 40c; bu., $8.00.

We can supply other Tree Seeds—Prices on Application.

How to Make a Hot Bed.

Select a well-drained spot, and make the pile of manure 15 to 18 inches deep; or a foot of soil may be dug out and filled in with manure, well trampled down. Place the frame on it. Then put four inches of good soil over the surface. Throw some manure or soil up against the outer boards, to hold the heat. Put on the sash and keep tight for three or four days. Keep a thermometer in the bed, and when the temperature falls to 75 degrees, seed may be sown with safety. The temperature in a hot bed should not be allowed to go above 70 degrees in the day, nor below 50 at night. With a hot bed the amateur can start almost any kind of vegetable or flower seed. By sowing such vegetables as Egg Plant, Pepper, Tomatoes, etc., and such flower seeds as Heliotrope, Scarlet Sage, Vinca, Verbena, etc., along in March, it is possible to have nice stocky plants ready to set out as soon as the weather conditions are favorable, insuring early returns from the vegetables and a long season from the flowers.

Dear Sirs—I am well pleased with the No. 2 Sharples Cream Separator. I wish to specially thank you for not filling my order as originally sent, viz: for a separator; it would have been useless.

MR. F. W. HOUSER, California, Mo.

Dear Sir—Last spring I ordered from your house ten bushels of German Millet seed, which proved to be very satisfactory, and I raised a nice crop. Very respectfully,

G. E. HITE.
Archias' Evergreen Lawn Grass Seed

This is a mixture of celebrated Kentucky Blue Grass and other soft bladed grasses that will withstand the heat and dry weather of our summers and our most severe winters and insure a permanent evergreen lawn.

Archias' Evergreen Lawn Grass Seed is as pure and reliable as can be found anywhere. We highly recommend this mixture for general purposes.

Price of Archias' Evergreen Lawn Grass Seed—1 lb. 25c; 10 lbs., $2.00; 25 lbs., $4.50; 100 lbs., $16.50. If wanted by mail, add 10c per pound to pay postage.

Archias’ ‘Shady Nook’ LAWN GRASS MIXTURE.

A mixture of grasses that will thrive in a shady situation, under trees or close to walls where there is little sun. Lb., 25c; 5 lbs., $1.10; 10 lbs., $2.00.

Archias’ ‘Sure’ Brand Kentucky Blue Grass.

Blue Grass is a very valuable lawn grass. Our stock is direct from Kentucky and should not be compared with the cheap Western wild blue grass seeds offered by some houses. Sow two bushels per acre for lawn. Extra fancy, per lb., 25c; postpaid, 25c. Not prepaid, pk., 75c; ½ bu., $1.20; 1 bu., (14 lbs.) $2.25; 2 bu., or over, $2.15 per bu. Sacked free.

To produce a Good Lawn—Plow or dig up the surface thoroughly to a depth of twelve inches and mix the soil with well-rotted manure or our Hemlet Brand Lawn Fertilizer, the latter being at all times, preferable, as it is more durable in its effects and free from weed seeds, which are always contained in more or less quantities in stable manure.

The soil should be well pulverized before sowing, and the lawn kept free from weeds the first season. The quantity of seeds required is one pound to every 500 square feet.

DUNHAM ROLLER BEARING LAWN ROLLERS.

The best and only roller-bearing Lawn Roller made. Length and weight precisely as listed.

Rollers are smooth on face and aluminum finish, outer edges rounded to avoid cutting up the lawn.

The stalks are of medium height with many broad leaves, making it one of the best sorts for ensilage and fodder. Numerous tests at the Experiment Station show it high in protein and oil content, making it valuable to the stock grower and feeder. By mail postpaid, 1 lb., 25c; 3 lbs., 60c. White Varieties.

BOONE COUNTY WHITE.

A pure bred white corn of very large size and high fattening and milling qualities. It is rather a late variety, maturing in from 115 to 120 days, and can not be recommended for planting north of Missouri and Kansas. For general planting throughout this state and farther south it will give highly satisfactory results in all soils and seasons. Years of scientific breeding and patient selection have developed this variety into the largest yielding white corn known.

A very large, fat, heavy ear, tapering only slightly from butt to tip, rounding off nicely within an inch of the top; eighteen to twenty-four rows of about fifty kernels each, carried out to the full length of the ear.

Tips and butts that are exceptionally well filled out; the entire surface of the cob is completely covered with a solid layer of grains one-half to three-fourths of an inch deep.

White cob of medium size, which, together with its depth of grain, gives it a remarkably high selling percentage. Don’t fail to try it. By mail, postpaid, 1 lb., 25¢. By Freight or express, qt., 10¢; pk., 50¢; ½ bu., 90¢; bu., $1.75; 2 bu., $3.25; 5 bu., $8.90; 10 bu., $15.00. Sacked free.

Johnson County White Dent is a very highly bred pure white corn adapted to all of the corn belt.

Bromus Inermis—Introduced from Hungary, Europe, by the U. S. Dept., of Agriculture. Particularly adapted to rather poor, dry soils which are not suitable to other grasses, and is useful for both grazing and hay, especially in mixture with other grasses. We do not consider it as valuable, as it has generally been recommended, but for lands which will not grow better grasses, would recommend it. Sow from two to three bushels to the acre either in spring or fall. Per lb., 30c; bu., (14 lbs.) $1.75.

The Amount of Seed necessary to sow an acre largely depends on the quality of land; the poorer the soil the larger the quantity required. A fair average is from 35 to 40 pounds to the acre. The thicker seeds are sown, the sooner will a fine close turf be obtained.

Broadcast Seeders.
The Improved Cyclone Seeder has stood every test of more than forty years exacting service. It will sow all varieties of Farm Seed that can be sown broadcast and with ease to the operator; 5 acres per hour is a fair average for the Cyclone. The seed is distributed evenly and with great saving of time which makes this a very practical machine on any size farm. It increases profits both ways—in better crops and in time and seed saved. It will pay for itself in sowing one bushel of clover seed. It is a convenient, practical and durable machine. Sent anywhere on trial. Price, each, $1.50.

Chicago Seeder, is like the Cyclone only that it operates with a bow instead of a crank. Price, each, $1.25.

Little Wonder Seeder, smaller than the Cyclone, operates with a crank. Price, each, $1.00.

Cahoon Seeder, well known will do good work like the Cyclone. Price, each, $2.95.

Every sower fully guaranteed by the manufacturers.

I have used Armour’s Ammoniated Dissolved Bone and Potash every year beginning 1901, and expect to use it this year. Am sure it pays well on wheat for it increases the yield, improves the berry and prevents rust. I am well pleased with the results.

Ritchey, Mo. HENRY VERKAMP.

I used 1000 pounds of Armour’s Ammoniated Dissolved Bone and Potash on part of my wheat and made twenty bushels to the acre. Other wheat without fertilizer made only eight bushels. The quality of the fertilized wheat was twice as good as the unfertilized.

25c--SEED DUE BILL--25c

Good for 25 Cents Worth of Seeds in Packets

We want everyone who secures this catalogue to send us at least a trial order. A large per cent of our customers remain with us from year to year, and by fair dealing we endeavor to make all our personal friends. Again last year through the good will of our friends, we increased our mailing list many thousands, and this year we hope to introduce ourselves through the medium of our catalogue and by fair representations, to thousands of new people.

Any one receiving this insert, in one of our catalogues, can detach the "Due Bill" below, and by returning it to us, with his first order, select 25 cents worth of seeds, in packets, additional. See Due Bill

We want your orders, and as a special inducement for you to give us a trial this year, we make the above offer. This is in addition to the discounts we allow on all packets and ounces.

A small order from you this spring will place your name and address on our books, and you will receive our catalogue at the first of next season.

Most sincerely yours,
ARCHIAS' SEED STORE CORPORATION,
Sedalia, Missouri

DETACH HERE—SEE OTHER SIDE.

25c Free Seeds! 25c
Not Good After March 1st.

SEED DUE BILL

This Due Bill (see other side) is good for 25 cents worth of Vegetable or Flower Seeds in packets (not including collections), your own selection, when returned with any order amounting to $1.00 or more.

If returned to us, this season, with any order, we will keep your name on our mailing list and send you our catalogue for another year without request.

ARCHIAS' SEED STORE CORPORATION
Selection must be made at time of ordering.

25c
March and April are our busy months, and we often find it necessary to work nights, in order to keep up with our orders. From one cause or another many of our customers delay sending in their orders until the last moment. To induce as many as can order earlier, we have decided to offer an extra discount—five per cent in cash—on everything quoted in our catalogue but not on special prices not quoted in catalogue, a few things like Clover Seed, where the prices are marked "subject to change," provided the order reaches us on or before March 1st. In other words, if your order amounts to $5.00, and you intend sending it to us in March or April, mail it so we will receive it by March 1st, and we will accept, from you, in full payment for the order $4.75. Furthermore, we will allow you (see other side) 25 cents worth of seeds in packets extra, with your first order.

No matter how large, or how small your order, it will pay to send it in early—five per cent is a pretty liberal discount for so short a time. If, however, you should not order until the seeds are needed, we will give your usual prompt attention.

ARCHIAS' SEED STORE CORPORATION,
Sedalia, Missouri.

We'll Stand Part of the Cost

We should like to place a year's subscription to the GARDEN MAGAZINE in the hands of every one of our patrons, because it will help them to a wiser selection, better care, and richer enjoyment of the flowers they buy from us.

The publishers' price is $1.50 a year, and it is well worth the money. But our price for reasons already stated (to any one who will order $1.00's worth from our Catalog) is going to be only $1.00 a year, thus we save you 50c.

Or if you prefer to pay to us the publishers' price of $1.50 a year (and we repeat that the Magazine is well worth that cost) you may also have, entirely free, from us 50c. worth of anything else you choose to select from our Catalog.

This is our way to encourage you to take and read the Garden Magazine.
